

# TRUMP'S NUCLEAR BLUFF AND PROJECT 38

Which one must prevail: ego self-gratification or benefit of the other?

By Pierre Beaudry, 6/22/ 2015

At 7:50 last night, American President Donald Trump announced to the world :

“We have completed our very successful attack on the three Nuclear sites in Iran, including Fordow, Natanz, and Esfahan. All planes are now outside of Iran air space. A full payload of BOMBS was dropped on the primary site, Fordow. All planes are safely on their way home. Congratulations to our great American Warriors. There is not another military in the World that could have done this. NOW IS THE TIME FOR PEACE! Thank you for your attention to this matter.” [Truth Details | Truth Social](#)

The only thing this PEACEFUL ACTION demonstrates is that if you want peace, you must go to war. If you wish to witness a true non-contradictory peaceful action in the spirit of development and cooperation, have a look at what President Vladimir Putin is accomplishing in Moscow at the same time.

The optimistic spirit of development and cooperation that such a new, creative system implies was on full display this week at the St. Petersburg International Economic Forum (SPIEF). Credit: kremlin.ru

There has never been such a momentous decision to be made for the survival of mankind as the one that we have to make today. The nuclear bluff statement by American President, Donald Trump, which said, "***I may do it; I may not do it. I mean, nobody knows what I'm going to do***", is unfortunately not only trumpeting a call for the purpose of forcing the Iranians to back down and surrender to Israeli pressure to give up their nuclear program, but it is also threatening the American people to either support him in his madness or get ready to be blown out of existence with a nuclear strike. This is the clearest danger for America and the rest of the world by Donald Trump since Hiroshima: [Hiroshima Nagasaki Peace Committee of the National Capital Area | Abolish Nuclear Weapons](#)

The world strategic situation has entered such a state of instability that it poses the ultimate test to human resilience for each and every one of us: can the human mind become so evil that it is able to enslave reason without going mad itself? In other words, on the Trump side can you bluff the world with the danger of extinction and get away with it? On the British side of this same question, can Nazism rule over mankind and get away with imposing its will on the entire world, without falling apart? Helga Zepp-LaRouche proposed a solution to these questions. According to EIR, on June 20, 2025, RIA *Novosti* published an interview with Helga in which she stated:

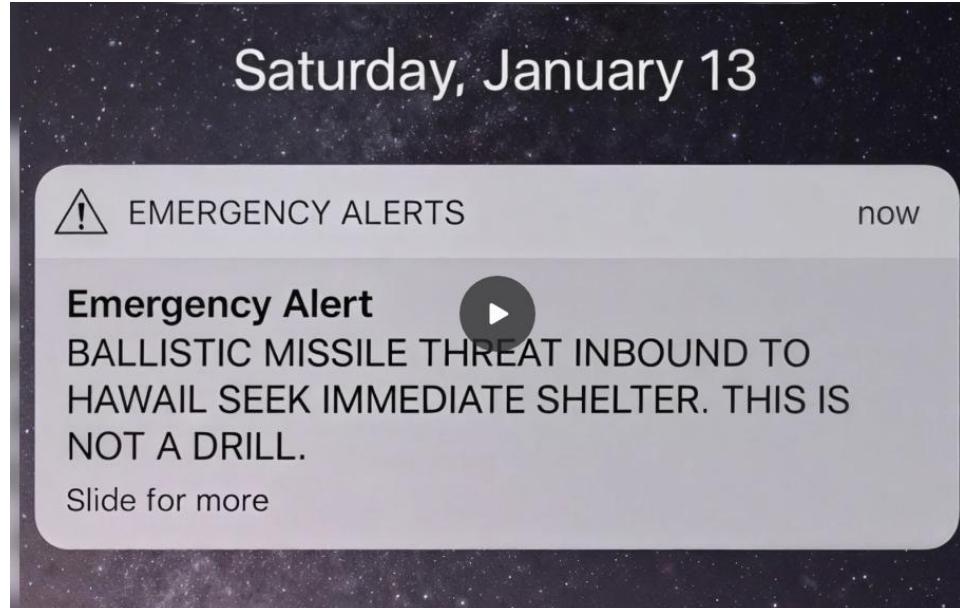

“The United States, China and Russia should intensify direct dialogue between their presidents. But the only force that could change the balance of power is the countries of the global majority. If they, representing 85% of the world’s population, loudly and jointly condemned the warmongers and offered cooperation within the framework of a new architecture of global security and development, they could change the situation.” [\*\*\[RIA Novosti Interviews Zepp-LaRouche: Magnify the Voice of the Global South To Avert World War III\]\*\*](#)

She then asked: “Can the BRICS assembly of nations bring reason back to the world by offering a new monetary system which will guarantee the security and development of every nation on the planet?” Russian President, Vladimir Putin, echoed this LaRouche proposal by stating:

“A fundamentally new development model is needed, built not on the rules of neocolonialism, where the so-called golden billion sucks out resources from other countries in the interests of a narrow circle of so-called elites.... Let me reiterate: the task is not to modernize the outdated mechanisms of the era of globalization—they have largely outlived their usefulness or even discredited themselves. It is necessary to propose a new model of development, free from political manipulations, taking into account the national interests of countries.” [June 20, 2025. [\*\*Plenary session of St Petersburg International Economic Forum • President of Russia\]\*\*](#)

Scott Ritter made a similar, but more aggressive proposal: [\*\*PROJECT 38.\*\*](#) Scott wrote:

“On January 13, 2018, President Trump's failed non-proliferation policies resulted in 38 minutes of terror for the citizens of Hawaii. Project 38 seeks to reclaim these moments for all Americans.

[...]

### “The Problem

“On February 4, 2026, the last remaining strategic arms control treaty between the United States and Russia, New START, will expire. Void of an extension of this treaty, or the activation of an alternative arms control mechanism that replicates/improves on the existing treaty, there will be an extremely high risk of both the US and Russia feeling compelled to enter an expensive and potentially catastrophic nuclear arms race.

“This danger is further magnified by the Trump administration’s pursuit of a new national ballistic missile defense scheme, known as the Golden Dome, which even as a concept is destabilizing from an arms control and disarmament perspective.

“The Trump administration has not articulated a clear vision when it comes to resolving the need to extend New START prior to its

expiration or the complications raised in this regard by the pursuit of the Golden Dome initiative.

### **“The Solution**

“Project 38 is a campaign that seeks to promote effective arms control and disarmament policy and, in doing so, avoid the dangers of a new nuclear arms race.

“Project 38 has one objective: to gain access to President Trump and/or his senior national security and foreign policy advisors for the purpose of making a 38-minute “elevator pitch” on the need for an alternative policy approach toward arms control and disarmament between the United States and Russia.” [\*\*\[Project 38 - Real Scott Ritter\]\*\*](#)

### **CONCLUSION: TRUMP’S BOMBING OF IRAN IS A COMPLETE SHAM.**

Since the name of the game is that “NO ONE SHOULD BE TRUSTED TO TELL THE TRUTH ANYMORE,” it should be known that Trump lied through his teeth on television last night about the bombing of Iran. The show was a complete theatrical fake from beginning to end, “smoke and mirrors,” as EIR’s Carl Osgood put it.

American Bombers flying over to Iran and launching their super “bunker buster” bombs against the three Iranian nuclear research locations did not destroy Iran’s nuclear capabilities. The truth of the matter is that the bombing took place mainly from the American Air Force on location and the entire world has been made to believe that the great bluffing Donald Trump succeeded in fooling everybody by winning a great victory in bringing the Iranians to their knees. The whole television scenario was a complete fake, and the expected reply from Iran is that they, in turn, will tell the truth by saying that their nuclear facilities have not been totally destroyed. This unlawful American attack was not successful. How can one negotiate with someone you humiliate and attack at the same time?

Finally, the truth to be understood in temporal eternity from all of this lying mess was put forward a day before by senior correspondent for the Italian Catholic

Daily, *Avenir*, Fulvio Scaglione, when he warned on June 20, 2025 that the attacks against Iran were not merely aimed at destroying their nuclear research program but primarily aimed at sabotaging the Belt and Road Initiative. Scaglione wrote:

“In essence, it is a matter of carrying out two operations, breaking the economic-military axis between Russia and Iran, which in recent years has materialized with the supply of Iranian drones, Rosatom’s construction of two new nuclear reactors for the Bushehr power plant (and Putin has announced an agreement with Israel to secure the 200 Russian technicians), and the North-South Trade Corridor project. And to block the economic channel between Iran and China, which brings 15% of the oil consumed by Beijing from Tehran to the East, while a few weeks ago the direct railway line between Xi’an and Aprin [dry port near Tehran, Iran] was inaugurated, capable of transforming Iran into an alternative commercial hub. In essence, to undermine the political presence of the two giants in the Middle East, which has now become cumbersome.” **[Putin's strategy between China and Iran: why peace in Ukraine can wait.]**
