Hello [REDACTED]

The documents would need to be converted to a different format. I will talk to someone about getting the documents converted to a different format.

Thank you.

That's no problem, we don't need those on Relativity. Separately, though will we be able to play those video files *not* on a DVD? That is, we only have them in electronic format (in the file folders) – I haven't tried to play them, so maybe it's just as easy as that, but wanted to check if we need to get them processed in some other fashion to be able to view independently of a DVD player.

thanks,

Good Morning [REDACTED],

I have noticed that some of these documents contain data that appears to be from a DVD. A DVD contains a bunch of separate files to make everything play on a DVD, but it will not make sense to load DVD information into Relativity. The following should not be loaded to Relativity:

1.

Could we please load the documents in the following folder into Relativity for US v. Epstein (USAO # 2018R01618):

<\\Usa.doj.gov\cloud\NYS\StAndrews\Shared\USvEpstein-2018R01618\Investigation\# 2018 SDNY investigation\Subpoena Returns\Boies Schiller\2019-03-04, Boies Schiller first subpoena response>

In terms of structure, we'd like to create a folder identified as "Subpoena Returns" (at the same level as "FBI Case File" is currently), and in a subfolder within Subpoena Returns, a folder titled "BSF returns," and within that a subfolder identified as "BSF first production" that the docs in the above link can be deposited into (including any additional subfolders). Does that work?

Please let me know if any questions or if any other information would be helpful, and if you could please let us know when it's all uploaded?

thanks very much,
